PENERANGAN / INFORMATION:

1. Two Way Communication

- 1.1 Communication can be defined as a process of transferring information from one place to another through sender and receiver to produce a response and achieve an objective.
- 1.2 Information can be delivered through the word of mouth, in written form or through body language.
- 1.3 The number and types of methods increase as information technology systems become ever more sophisticated. Successful communication is accomplished by being able to make people believe in what is being said. To do this, the speaker must be sincere and enthusiastic and have all the facts needed to back up the message.
- 1.4 The main objective of communication is to convey a message or information, to persuade and to solve the problem. So the communication is a life blood of an organization. It helps in planning, in making and implementing decision and builds relationships.
- 1.5 The process of communication involves the delivery of information from speaker to recipient through a few steps via channel or media. There are sender, encoding, receiver, decoding and feedback.
 - i) Encoding is the formulation of message.
 - ii) Decoding is the interpreting of the message for understanding.
 - iii) Feedback is reaction or response of the receiver that reaches the sender.
 - iv) Media is channel or source through which message is carried to the receiver.
- 1.6 Effective communication takes place only when the listener clearly understands the message that the speaker intended to delivered.

2. Communication Procedures

NO. KOD / CODE NO.	Z-009-2:2015-M01/P(1/3)	Mukasurat / Page : Drpd / of : 8
---------------------------	--------------------------------	---

2.1 Each organization often creates procedures which are designed to communicate effectively and efficiently with their staff. When you enter a new workplace, one of the first things you will need to get to know is what systems are used to help people communicate and how do they relate to you and your job. Some organizations will have informal rules. Some workplaces can be very strict, with elaborate rules.

2.2 Procedures for communication are rules that are put in place by the organization to ensure that everyone does their job properly. Procedures might relate to:

- i) Specific tasks
- ii) Following instructions
- iii) Requests from colleagues
- iv) Answering telephone calls
- v) Use of voice mail
- vi) Use of internet and email
- vii) Formal and informal discussions

3. Types of Communication

3.1 Internal communication involves communicating inside the organization with our colleagues and supervisors that is the people you work with. There are two (2) types of communication that can be used at a workplace:-

- i) Verbal communication.
- ii) Non verbal communication.

3.2 Verbal communication is communication that uses words to get a message, idea, thought, argument, or piece of information across. It can be oral or written. Non-verbal communication is communication that uses a non-verbal to get an information by using facial expressions, gestures, body language, signals and symbols.

4. Information Objective

4.1 Analyzing information objective is collected throughout any proving and improving process can range from very simply drawing conclusions based on feedback to creating spreadsheets to hold information, so that user can look across various responses from different people. It can be done by one person and summarized in a report or it can do by a group of people as a basis for a discussion. There are three (3) element of information objective:

- i) Gather and organize information
- ii) Research and analyze information
- iii) Present information

a) Gather and Organize Information;

- Information is gathered and organized in a format suitable for analysis, interpretation and dissemination in accordance with organizational requirements
- Information held by the organization is accessed and assessed for accuracy and relevance in line with established organizational requirements
- Methods of collecting information are reliable and make efficient use of resources in accordance with organizational requirements
- Business technology is used to access, organize and monitor information in accordance with organizational requirements
- Information is updated, modified, maintained and stored in accordance with organizational

b) Research and Analyze Information;

- Objectives of research are clearly defined and consistent with organizational requirements
- Data used in research is valid and relevant to research purposes
- Research strategies are appropriate to the requirements of the research and make efficient use of available resources
- Methods of data analysis are reliable and suitable to research purposes

NO. KOD / CODE NO.	Z-009-2:2015-M01/P(1/3)	Mukasurat / Page : Drpd / of : 8
---------------------------	--------------------------------	---

- Assumptions used in analyses are clear, justified and consistent with research objectives
- Conclusions are supported by evidence and contribute to the achievement of business objectives

c) Present Information;

- Recommendations and issues are presented in an appropriate format, style and structure using suitable business technology
- Structure and format of reports are clear and confirm to organizational requirements
- Research findings are reported and distributed in accordance with organizational requirements
- Feedback and comments on suitability and sufficiency of findings is obtained in accordance

4.2 Type Of Information

Despite their simple organization, routine request deserve a tactful touch. In many organizations, there are many form of information such as memo, letter and reports like these are sent to hundred or even thousands employees, customer, clients, and shareholders. So the potential for creating a positive impression is second only to the risk of causing ill will through ambiguous wording or a discourteous tone.

In the large part, reports are managerial tools. The goal when developing a report is to make the information as clear and convenient as possible, because time is precious, tell the readers what they need to know –no more, no less-and present the information in a way that is geared to their needs. Some people like to use a computer to compare the information from reports he receives, some manager like to get their reports orally, face to face but many managers prefer the convenience and permanence of written paper reports. The purposes of the report are:-

- To monitor and control operations
- To help implement policies and procedures
- To comply with the legal or regulatory requirement

NO. KOD / CODE NO.	Z-009-2:2015-M01/P(1/3)	Mukasurat / Page : Drpd / of : 8
---------------------------	--------------------------------	---

- iv) To obtain new business or funding
- v) To document work performed for a client
- vi) To guide decisions or particular issue

5. Communication Ethics Principles

5.1 Ethics in small groups refers to the moral aspects of group interaction. The ethical communication enhances human worth and dignity by fostering truthfulness, fairness, responsibility, personal integrity, and respect for self and other." Thus, ethical communication in small groups takes into account caring and responsibility for oneself and the other group members.

Generally in small group work our concern is focused on getting the job done while still maintaining reasonable relationships among group members. Although some ethical dilemmas are more easily solved than others, all involve making evaluations and judgments about what is morally right and wrong, what is fair and what is not fair, and what will cause harm and what will not cause harm.

5.2 Principle of Communication Ethics

- i) Truthfulness, accuracy, honesty, and reason are essential to the integrity of communication.
- ii) Endorse freedom of expression, diversity of perspective, and tolerance of dissent to achieve the informed and responsible decision making fundamental to a civil society.
- iii) Strive to understand and respect other communicators before evaluating and responding to their messages.
- iv) Access to communication resources and opportunities are necessary to fulfill human potential and contribute to the well being of families, communities and society.
- v) Promote communication climates of caring and mutual understanding that respect the unique needs and characteristics of individual communicators.
- vi) Condemn communication that degrades individuals and humanity through distortion, intolerance, intimidation, coercion, hatred and violence.
- vii) Commit to the courageous expression of personal convictions in pursuit of fairness and justice.

NO. KOD / CODE NO.	Z-009-2:2015-M01/P(1/3)	Mukasurat / Page : Drpd / of : 8
---------------------------	--------------------------------	---

- viii) Advocate sharing information, opinions, and feelings when facing significant choices while also respecting privacy and confidentiality.
- ix) Unethical communication threatens the quality of all communication and consequently the well being of individuals and the society in which we live.
- x) Accept responsibility for the short- and long-term consequences for our own communication and expect the same of others.

These principles also apply to important aspects of effective small group communication, such as teamwork, critical thinking, creativity, and diversity. Thus, ethical communication in small groups means that group members respect and encourage diverse opinions, do not tolerate communication that degrades and harms others, balance the sharing of information with a respect for privacy, and listen for understanding and empathy before evaluating and critiquing.
