PENERANGAN/INFORMATION :

1. Information Dissemination Procedure And Process

- 1.1 Disseminate information means to distribute information or knowledge to the public so that it reaches people or organization without direct feedback.
- 1.2 Dissemination involves a sender and receiver. It is quite different from a traditional communication. In communication, a sender sending information, and receiver collecting the information, processing it and sending back to sender.
- 1.3 With dissemination, the information is sent out and received, but no reply is given. The message carrier sends out information to an audience.
- 1.4 Dissemination of information should be done according to the procedure and processed so that the recipient of such information could identify who the sender, date, time and clear and accurate information, as to obtain reaction.
- 1.5 Information delivery through manual also performed under certain circumstances so that the news came to the selected recipients or two-way interaction. It also can be done through weekly meeting or personnel discussion.
- 1.6 The use of electronic for the dissemination of information can deliver information faster. Nevertheless all process information dissemination activities must be done in accordance with the SOP, the truth and the approval.

2. Application Of Language

2.1 The use of language in an organization needs to be adjusted so that the desired work smoothly.

2.2 An organization will set a custom language such as in Malaysia, the use of language is Bahasa Malaysia and English. Local and foreign workers can interact with the language.

2.3 The use of English is often the case in the superior department in communicating with foreign workers and retail relationships international standards. But, Bahasa Malaysia as Malaysian National Language must be skilled and in practice in correspondence with the Government of Malaysia, the official ceremony with the Government and interaction with local majority workers.

Figure 2.1 Communication language with foreign workers.

i) Grammar

Grammar is the way in which words are put together to form proper sentences. Well versed in grammar can produce a clear explanation as required. Grammar can also measure skills of a person and integrity of an organization.

ii) Vocabulary

Mastery of vocabulary can enhance the presentation. A person's vocabulary is the set of words within a language that are familiar to that person.

A vocabulary usually develops with age or experiences, and serves as a useful and fundamental tool for communication and acquiring knowledge.

a) Reading Vocabulary

A literate person's reading vocabulary is all the words he or she can recognize when reading. This is generally the largest type of vocabulary simply because a reader tends to be exposed to more words by reading than by listening.

b) Listening Vocabulary

A person's listening vocabulary is all the words he or she can recognize when listening to speech. People may still understand words they were not exposed to before using cues such as tone, gestures, the topic of discussion and the social context of the conversation.

Figure 2.2 Good presentation make audience want to listen.

c) Speaking vocabulary

A person's speaking vocabulary is all the words he or she uses in speech. It is likely to be a subset of the listening vocabulary. Due to the spontaneous nature of speech, words are often misused. This misuse – though slight and unintentional – may be compensated by facial expressions, tone of voice, or hand gestures.

d) Writing Vocabulary

Words are used in various forms of writing from formal essays to Twitter feeds. Many written words do not commonly appear in speech. Writers generally use a limited set of words when communicating: for example

- If there are a number of synonyms, a writer will have his own preference as to which of them to use.
- He is unlikely to use technical vocabulary relating to a subject in which he has no knowledge or interest.

3. Report Writing Skills

3.1 Report writing skills through either manual or electronic products must be delivered with the exact and correct language so the message is easy to understand. Write and convey information should be done in a way that is readable and understandable.

3.2 The foundation in writing and presenting information in an organization, such as a Department to another Department, usually brief but understood its meaning. Note that there should be such as the name of the sender to the recipient, the date, time, name of the Department (if necessary) and title information. Practice the presentation usually two paragraphs which is the purpose of the information and the second paragraph is the goal.

i) Usage of Personal Computer (PC)

Have knowledge of using computers is an asset because it is a communication tool. Personal computers have become commodities and important not only for the benefit of themselves and even jobs. In the Organization, knowledge and understanding of operating data base software program such as windows, scanner and many others can help speed up the work of administration, operations and so on.

ii) E-mail Knowledge

Electronic mail, most commonly referred to as email or e-mail (since 1993), is a method of exchanging digital messages from an author to one or more recipients.

Modern email operates across the Internet or other computer networks. Some early email systems required the author and the recipient to both be online at the same time, in common with instant messaging.

- Electronic mail (E-mail) has several language spelling options.
- E-mail is the most common form used online and world wide.
- E-mail practice as official letter for certain organization communication and acknowledgment.
- E-mail was the form used in the original Request For Comments (RFC). The service is referred to as *mail*, and a single piece of electronic mail is called a message

4. Electronic information delivery process

4.1 The process of the delivery of electronic information it deems necessary and important because it collects and connects data and information required by the department or a particular organization.

SOALAN/QUESTION :

1. Explain the different between manual and electronic information disseminate.
2. Why is Personal Computer (PC) an asset as communication tool?
