TAJUK/TITLE: TEAM WORK

TUJUAN/PURPOSE:

The purpose of this section is to provide the trainee with information and self-assessment and skill development exercises that will assist the trainee to develop teamwork skills. The person who is competent in this module will become a more effective leader as he/she is able to develop team work skills which benefits the performance and reduce problems through a good teamwork skills practices.

PENERANGAN/INFORMATION:

1. Team Work Abilities

- 1.1 Team work is cooperative or coordinated effort on the part of a group of persons acting together as a team or in the interests of a common cause.
- 1.2 The best working team is a group of workers who are able to take responsibilities for managing their own work. A self-managing work team is a small group of employees responsible for managing and performing technical tasks to deliver a product or service to an external or internal customer.
- 1.3 Advantages and disadvantages of team work are:
 - i) Advantages: A group of knowledgeable people can bring about synergy, whereby the group's total output exceeds the sum of each individual's contribution. Groups help gain acceptance and commitment. Team members often critically evaluate each other's thinking, thus avoiding major errors. Working in teams and other group also enhances job satisfaction and need satisfaction, such as the need for affiliation.
 - ii) Disadvantages: Groups and teams often talk too much and act too little. A major problem in groups is pressure toward conformity to group standards of performance and conduct which could hurt the organization. Social loafing is the shirking of individual responsibility in a group setting. At their worst, groups foster conflict, with people bickering about matters such as doing a fair share of work. Groups can become xenophobic, thus entering into conflict with other groups.
- 1.4 Characteristics of effective teams are:
 - i) Membership: two or more individuals work together toward a common goal.
 - ii) Common goal: the members have negotiated shared aims and goals.
 - iii) Social organizations: the group develops or actively negotiates functional norms, roles, and relationships;
 - iv) Interdependence between members: members succeed only if all succeed.

NO. KOD / CODE NO.	Z-009-3:2015-M03/P(3/6)	Mukasurat / Page : 3 Drpd / of : 9
---------------------------	--------------------------------	---

- v) Productive involvement: all members are supported to contribute equally to the workload; resources and skills are identified early on and used effectively. Decisions are made by consensus.
- vi) Effective communication and interaction: face-to-face and other modes of communication help to monitor group processes and dynamics, drive creativity and enable productive work practices
- vii) Mutual interest: members focus on the interests of the group as a whole, and avoid personalising problems or differences of opinion
- viii) Collective consciousness: members perceive themselves as belonging to the group even when the group is not together
- ix) Mutual trust: members listen to each other, respect contributions, help each other to clarify ideas, and show interest in each other
- x) Cohesion: group processes function smoothly without need for intervention, members are able to contribute equally to produce something greater than the individual parts, individual contributions are brought together seamlessly and within nominated deadlines, and members feel they have learnt something from the process and from the other group members

1.5 A major challenge in becoming an effective team member is to choose the right roles to occupy. Frequently observed positive roles are :

- i) Knowledge Contributor: The Knowledge Contributor provides the group with useful and valid information, and shares technical expertise with team members. A person occupying this role pays enough attention to the human element to get the task accomplished.
- ii) Process Observer: The process, or soft side, of teamwork includes the transactions that take place among and between team members. The Process Observer forces the group to look at how it is functioning by confronting others about the transactions taking place.
- iii) Collaborator: The collaborator keeps the team focused on its goal and frequently reminds the group to do whatever is necessary to stay on track.
- iv) People Supporter: The People Supporter assumes some of the leader's responsibility for providing emotional support to teammates and resolving conflict. He or she serves as a model of active listening, and is a model of etiquette and professionalism.

NO. KOD / CODE NO.	Z-009-3:2015-M03/P(3/6)	Mukasurat / Page : 4 Drpd / of : 9
---------------------------	--------------------------------	---

- v) Challenger: The Challenger confronts and challenges bad ideas, yet has good interpersonal skills. He or she will criticize any decision or preliminary thinking that is deficient, including ethical problems.
- vi) Listener: Listening is part of other roles, yet it contributes so substantially to team success that it comprises a separate role. The team leader must shift frequently into the Listener role. The Listener provides summaries for the group.
- vii) Mediator: The Mediator attempts to resolve conflict by asking permission to interpret each position, then makes the interpretation. Each side is given the opportunity to edit or correct the statement of his or her position. Mediation can move a group away from being stuck, and on to more productive activity.
- viii) Gatekeeper: When the opportunity gate for speaking is closed for several members, the Gatekeeper intentionally opens the gate. The Gatekeeper will request that a specific team member be allowed to contribute, or that his or her past contribution be recognized.

2. Team Cooperation

2.1 In the workplace, cooperation represents the blending of many skills to produce collective achievement. Even in teams where some members are competitive in nature, there are simple things you can do inspire genuine cooperation.

2.2 All workplace teams have the common element of people working together cooperatively and members possessing a mix of skills.

- i) Self-Managing Work Teams: The best known work team is a group of workers who take over much of the responsibility for managing their own work. A self-managing work team is a small group of employees responsible for managing and performing technical tasks to deliver a product or service to an external or internal customer. The vast majority of large- and medium-size firms make some use of self-managing work teams. Such teams perform a wide variety of manufacturing and service activities.
- ii) Cross-Functional Teams: A cross-functional team is a work group composed of workers from different specialties, at about the same organizational level, who come together to accomplish a task. The people from different specialties are supposed to blend their talents. Cross-functional teams are widely used in product development.
- iii) Virtual Teams: Some teams conduct most of their work by sending electronic

NO. KOD / CODE NO.	Z-009-3:2015-M03/P(3/6)	Mukasurat / Page : 5 Drpd / of : 9
---------------------------	--------------------------------	---

messages to each other rather than conducting face-to-face meetings. A virtual team is a small group of people who conduct almost all of their collaborative work by electronic communication rather than face-to-face meetings.

2.3 In creating a good team cooperation, team members must:

- i) Focus on Team Goals –Keeping the team’s goals center stage, and explaining how each person’s “to do’s” contribute to the team’s mission, encourages team members to be more cooperative as individuals in order to be more competitive as a team.
- ii) Focus Team Members on Doing Their Best (Not on “Besting” Other Teammates) – Make sure members know that they’ve been put on the team not to show what they can do personally, but rather to assist in making the TEAM successful. Identify each person’s strengths from the standpoint of how those strengths will blend with others to help the team achieve its desired outcomes.
- iii) Reward the Team by Distributing Rewards Cooperatively Rather than Competitively – Celebrate as a group when the team defeats its “opponent” (such as solving a key problem) and recognize individual contributions toward that victory.
- iv) Don’t Confine Cooperation – Encourage team members to find ways of cooperating with other departments and outside entities in order to uncover fresh insights and new ways of doing things.

2.4 Effectiveness as a team player can be enhanced by understanding the skills, actions, and attitudes required to be an effective team player. A convenient method for classifying team activities in pursuit of goals is people-related versus task-related.

- i) Trusting Team Members: The cornerstone attitude of an outstanding team player is to trust team members including the leader. Working on a team is akin to a small business partnership. Trusting team members also includes believing that their ideas are technically sound and rational until proven otherwise.
- ii) High Level of Cooperation and Collaboration: Cooperation and collaboration are synonymous with teamwork. Collaboration at a team level refers to working jointly with others to solve mutual problems. Achieving a cooperative team spirit is often a question of making the first move.
- iii) Recognizing the Interests and Achievements of Others: A fundamental tactic for establishing oneself as a solid team player is to actively recognize the interests and achievements of others. Let others know that you care about their interests. Be

NO. KOD / CODE NO.	Z-009-3:2015-M03/P(3/6)	Mukasurat / Page : 6 Drpd / of : 9
---------------------------	--------------------------------	---

prepared to compliment any tangible achievement.

- iv) Share the Glory: An effective team player shares praise and other rewards for accomplishment even if he or she were the most deserving. Shared praise is usually merited to some extent because teammates have probably made at least some contribution to the achievement that received praise.
- v) Don't Rain On Another Person's Parade: We all have achievements and accomplishments that are sources of pride. Belittling the achievements of others for no legitimate reasons brings about tension and anger. Suppress your feelings of petty jealousy.

3. Communication Skills

3.1 Communication is the process of transferring signals or messages between a sender and a receiver through various methods such as written words, nonverbal cues, or spoken words. Effective communication skills are fundamental to success in many aspects of life. Many jobs require strong communication skills and socially people with improved communication skills usually enjoy better interpersonal relationships with friends and family.

3.2 To function successfully in a small group, trainee needs to be able to communicate clearly on intellectual and emotional levels. Effective communicators:

- i) can explain their own ideas
- ii) express their feelings in an open but non-threatening way
- iii) listen carefully to others
- iv) ask questions to clarify others' ideas and emotions
- v) can sense how others feel based on their nonverbal communication
- vi) will initiate conversations about group climate or process if they sense tensions
 - a) brewing reflect on the activities and interactions of their group and encourage other
 - b) group members to do so as well

3.3 To work together successfully, group members must demonstrate a sense of cohesion. Cohesion emerges as group members exhibit the following skills:

- i) Openness: Group members are willing to get to know one another, particularly those with different interests and backgrounds. They are open to new ideas, diverse viewpoints, and the variety of individuals present within the group. They listen to others and elicit their ideas. They know how to balance the need for

NO. KOD / CODE NO.	Z-009-3:2015-M03/P(3/6)	Mukasurat / Page : 7 Drpd / of : 9
---------------------------	--------------------------------	---

cohesion within a group with the need for individual expression.

- ii) **Trust and self-disclosure:** Group members trust one another enough to share their own ideas and feelings. A sense of mutual trust develops only to the extent that everyone is willing to self-disclose and be honest yet respectful. Trust also grows as group members demonstrate personal accountability for the tasks they have been assigned.
- iii) **Support:** Group members demonstrate support for one another as they accomplish their goals. They exemplify a sense of team loyalty and both cheer on the group as a whole and help members who are experiencing difficulties. They view one another not as competitors (which is common within a typically individualistic educational system) but as collaborators.
- iv) **Respect:** Group members communicate their opinions in a way that respects others, focusing on “What can we learn?” rather than “Who is to blame?” See constructive feedback in the process section for more details.

3.4 Besides knowing how to develop a healthy group climate, trainee also needs to know how to function so that they are productive and accomplish their tasks effectively. An effective process will emerge as trainee exhibit these skills:

- i) **Individual responsibility and accountability:** All group members agree on what needs to be done and by whom. Each student then determines what he or she needs to do and takes responsibility to complete the task(s). They can be held accountable for their tasks, and they hold others accountable for theirs.
- ii) **Constructive Feedback:** Group members are able to give and receive feedback about group ideas. Giving constructive feedback requires focusing on ideas and behaviours, instead of individuals, being as positive as possible and offering suggestions for improvement. Receiving feedback requires listening well, asking for clarification if the comment is unclear, and being open to change and other ideas.
- iii) **Problem solving:** Group members help the group to develop and use strategies central to their group goals. As such, they can facilitate group decision making and deal productively with conflict. In extreme cases, they know when to approach the professor for additional advice and help.
- iv) **Management and organization:** Group members know how to plan and manage a task, how to manage their time, and how to run a meeting. For example, they ensure that meeting goals are set, that an agenda is created and followed, and that everyone has an opportunity to participate. They stay focused on the task and

NO. KOD / CODE NO.	Z-009-3:2015-M03/P(3/6)	Mukasurat / Page : 8 Drpd / of : 9
---------------------------	--------------------------------	---

help others to do so too.

- v) Knowledge of roles: Group members know which roles can be filled within a group (e.g., facilitator, idea-generator, summarizer, evaluator, mediator, encourager) and are aware of which role(s) they and others are best suited for. They are also willing to rotate roles to maximize their own and others' group learning experience.

4. Training And Development Program

- 4.1 The purpose of training and management development programs is to improve employee capabilities and organizational capabilities. Training and development programs may be focused on individual performance or team performance.

SOALAN/QUESTION :

1. What are the advantages and disadvantages of team work practice?
2. What are some of the characteristics of effective team work?
3. How to choose roles as team member?
4. What are the types of team work?
5. How to creat a good team cooperation?
6. What is communication skills and how to succeed the skills?
7. Why training and development program are important to organization?
