STANDARD PRACTICE

NATIONAL OCCUPATIONAL SKILLS STANDARD (NOSS) FOR; ADMINISTRATIVE MANAGEMENT LEVEL 4

1. INTRODUCTION

Based on the Third Industrial Master Plan, between 2006 and 2009, business and professional services grew at 6.3% and contributed 2.6% of GDP in 2009, equivalent to RM13.3 billion. This sector has the potential to raise productivity through intra and inter sectorial linkages and the diffusion of best practices and technology. In addition, it will continue to generate knowledge-intensive employment opportunities in line with moving to a high income economy. The target is to increase this sector's contribution to 3.3% of GDP by 2015. To achieve this target, the focus will be on further developing construction related and environmental management services.

On April 22, 2009 the Government had further liberalised the services sector to attract more foreign investments and bring more professionals and technology as well as strengthen competitiveness of the sector. Recognising the growth potential in the services sector, the Government has decided to immediately liberalise 27 services subsectors, with no equity condition imposed. These sub-sectors are in the areas of health and social services, tourism services, transport services, business services and computer and related services.

As at December 2005, a total of 106 Operation Headquarters (OHQs) have been approved by the Malaysian Industrial Development Authority (MIDA) for company in Malaysia. Of these, 82 have started operation. These companies are located outside the MSC Malaysia and engaged in providing business services, including outsourcing, R&D, back room operations and other qualifying business services, to their groups of related companies within and outside Malaysia.

Investments in the services sector in January-March 2012 totalled RM17.64 billion with 1,197 approved projects. Domestic investments in January-March 2012 accounted for 68.4 per cent (RM12.07 billion), while foreign investments were 31.6 per cent (RM5.58 billion). The projects approved during this period are expected to provide 19,894 job opportunities. With reference to the Third Industrial Master Plan and The Tenth Malaysian Plan, it is critically to have skilled personnel from the business services industry.

This NOSS is developed focusing on the Administrative Management area of the offices or OHQs.

The demand for qualified and experienced Administrative Management personnel is important as of now and may increase in the near future. Hence, the development of this NOSS is essential for the industry to have certain guidelines and standards based on the level of competencies that have been set by the industrial experts in this field.

Based on the development findings, it was decided that the entry level for Administrative Management personnel career is at Level 4. The justification is based on the nature of work that requires competency in performing a broad range of complex technical or professional work activities performed in a wide variety of contexts and with a substantial degree of personal responsibility and autonomy. Responsibility for the work of others and allocation of resources is often present.

This NOSS provides first-hand information to the workers regarding the Administrative Management working environment. This NOSS also provides a career path and employment development for those involved in this industry.

The minimum entry qualifications are those with interest to work in the area as mentioned above and hold Sijil Kemahiran Malaysia (SKM 3) in Executive Secretaryship. The candidate must be able to read, write and possess analytical skill and have interest in the Administrative Management.

3. DESCRIPTION OF COMPETENCY LEVEL

The NOSS is developed for various occupational areas. Candidates for certification must be assessed and trained at certain levels to substantiate competencies. Below is a guideline of each NOSS Level as defined by the Department of Skills Development, Ministry of Human Resources, Malaysia.

Malaysia Skills Certificate Level 1: (Operation and Production Level)	Competent in performing a range of varied work activities, most of which are routine and predictable.
Malaysia Skills Certificate Level 2: (Operation and Production Level)	Competent in performing a significant range of varied work activities, performed in a variety of contexts. Some of the activities are non-routine and required individual responsibility and autonomy.
Malaysia Skills Certificate Level 3: (Supervisory Level)	Competent in performing a broad range of varied work activities, performed in a variety of contexts, most of which are complex and non-routine. There is considerable responsibility and autonomy and management or guidance of others is often required.
Malaysia Skills Diploma Level 4: (Executive Level)	Competent in performing a broad range of complex technical or professional work activities performed in a wide variety of contexts and with a substantial degree of personal responsibility and autonomy. Responsibility for the work of others and allocation of resources is often present.
Malaysia Skills Advanced Diploma Level 5: (Managerial Level)	Competent in applying a significant range of fundamental principles and complex techniques across a wide and often unpredictable variety of contexts. Very substantial personal autonomy and often significant responsibility for the work of others and for the allocation of substantial resources features strongly, as do personal accountabilities for analysis, diagnosis, planning, execution and evaluation.

4. MALAYSIAN SKILL CERTIFICATION

Candidates after being assessed, verified and fulfilled Malaysian Skill Certification requirements shall be awarded with Diploma Kemahiran Malaysia (DKM) for Level 4 as for Level 5 shall be awarded with Diploma Lanjutan Kemahiran Malaysia respectively. All candidates are also recommended to undergo on job training to attain knowledge and skills in the Administrative Management field of work.

Assessment must be in accordance with the following:

This NOSS outlines Competency Unit (CU) in the Administrative Management working environment as required by the industry and has been developed and documented following extensive collaboration across key Malaysian organisations. To meet the requirements of this industry, it is imperative that the CU outlined follow a high standard as well as maintenance of consistency throughout the assessment process. This can only be done by stipulating a precise framework in which the assessment of CU must be conducted. The training & assessment of an Office Management practitioner must be deployed in accordance with JPK policy and standard as follows:

- a) The final assessment of competence must include the combination of documented continuous assessment conducted by the facilitator during training and the results of post-training examination;
- b) The post-training examination must be practical in nature and involve demonstration & application of the CU utilizing real equipment and real-world examples;
- c) The CU as outlined in this NOSS must be assessed throughout the training program and during a post-training examination;
- d) The learning environment and facilities need to be in accordance with the requirements of the industries;
- e) The development and assessment of the CU must demonstrate that they develop transferable skills;
- f) The development and assessment of the CU must include documentation by candidates both during training and examination; and
- g) All training and assessment materials must be mapped and verified to be in accordance with the NOSS Administrative Management by a panel of industry subject matter experts appointed by JPK.

5. JOB COMPETENCIES

Administrative Management personnel (Level 4) are competent in performing:

- Administrative staff development management
- Office asset & facilities management
- Office inventory management
- Office vendor administration
- Office policies administration
- Office special project administration
